

I'M VACCINATED BECAUSE

Learn more about the COVID-19 vaccine and why you should get it

The more people that get vaccinated, the closer we are to ending this pandemic. Your friends, neighbors and coworkers are getting vaccinated and are counting on you.

WHY YOU SHOULD GET VACCINATED TODAY!

TO PROTECT YOU | TO PROTECT YOUR LOVED ONES | TO PROTECT THOSE IN YOUR COMMUNITY

COVID-19 Vaccination will help keep you from getting COVID-19

- ▶ All COVID-19 vaccines are safe.
- ▶ All COVID-19 vaccines are effective at preventing COVID-19.
- ▶ Getting a COVID-19 vaccine helps keep you from getting seriously ill even if you do get COVID-19—which is very unlikely.
- ▶ The COVID-19 vaccine may reduce the spread of COVID-19.

Once you are fully vaccinated, life can start to get back to normal!

- ▶ After you are fully vaccinated for COVID-19, you can start doing some things that you stopped doing because of the pandemic. For example, you can safely gather indoors without masks with other people who are fully vaccinated.
- ▶ People are not considered fully vaccinated until two weeks after their second dose of the Pfizer-BioNTech or Moderna COVID-19 vaccine, or two weeks after a single-dose Janssen/Johnson & Johnson COVID-19 vaccine.

COVID-19 vaccination is a safe way to protect your loved ones and community

- ▶ COVID-19 can have serious life-threatening complications, and there is no way to know how COVID-19 will affect you. And if you get sick, you could spread the disease to family, friends and others around you.

COVID-19 vaccination is an important tool to help end the pandemic

- ▶ Wearing masks and staying 6 feet apart from others help reduce your chance of being exposed to the virus or spreading it to others, but these measures are not enough. Vaccines will work with your immune system so it will be ready to fight the virus if you are exposed.

How can you get the vaccine?

- ▶ Currently, COVID-19 vaccine eligibility is open to all individuals that are 16 years of age and over. As Neighborhood Health Center is currently only distributing the Moderna and Janssen/Johnson & Johnson vaccines, we are able to vaccinate any adult 18 years of age and older.
- ▶ Neighborhood Health Center offers the COVID-19 vaccine at each office for all eligible patients.

Ask your provider how you can get the COVID-19 vaccine, today!
Or call us at **716.875.2904** to setup a separate vaccination appointment
